DETAILED ACTION

Election/Restrictions

Restriction is required under 35 U.S.C. 121 and 372.

This application contains the following inventions or groups of inventions which are not so linked as to form a single general inventive concept under PCT Rule 13.1.

In accordance with 37 CFR 1.499, applicant is required, in reply to this action, to elect a single invention to which the claims must be restricted.

Group I, claim(s) 1-15, drawn to a method of misamylacylating a tRNA with a marker.

Group II, claim(s) 16-19, drawn to a kit comprising a component of a protein synthesis kit and a misamylacylated tRNA.

Group III, claim 20, drawn to a misamylacylated tRNA.

Group IV, claim(s) 21-68, drawn to introducing a misamylacylated marker into a translation system.

According to PCT Rule 13.2, unity of invention exists only when the shared same of corresponding technical feature is a contribution over the prior art. The inventions listed as Groups I-IV do not relate to a single general inventive concept because they lack the same or corresponding special technical feature. The technical feature of Group I is misamylacylating a tRNA which is shown by Rothschild et al (US 5,643,722) to lack novelty or inventive step by teaching the misamylacylating of a tRNA with a marker (column 10, lines 66-67 bridging column 11 lines 1-5) and does not make a contribution over the prior art.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
